Summary

Senior professional in Systems and Data, with solid experience in data architecture, modeling, and governance for Data Warehouse and Data Lake environments, working extensively with Microsoft Fabric. Specialist in ETL/ELT pipelines in Python, data automation and RPA, and Business Intelligence with Power BI. Experienced in the design, optimization, and maintenance of data environments, integrating multidisciplinary teams with a focus on performance, security, and quality.

Professional Experience

Systems Analyst *Nadir S/A | September 2025 – Present*

Results-driven Systems Analyst with extensive experience in requirements gathering, process optimization, and designing end-to-end data architectures. Specialized in low-code development, workflow automation, and executive data visualization, and in building modern Data Lakes, Lakehouses, and Data Marts with Microsoft Fabric, PySpark, and Delta Lake (Medallion Architecture: Bronze, Silver, Gold).

Key expertise:

- **Low-Code Development and Automation (Main Focus):** design and deliver corporate applications, document control towers (reports, committees, and multi-departmental tracking), and automated business workflows using Power Apps, Power Automate, and SharePoint security governance.
- **Systems Analysis and Architecture:** translate complex business requirements into scalable technical solutions, integrating enterprise ERP systems (SAP S/4HANA OData APIs, Material Ledger, SD modules) and optimizing workflow efficiency.
- **Data Engineering and Cloud Solutions:** design automated ETL/ELT pipelines, optimize complex SQL and Spark queries, and configure environments across Microsoft Fabric, OneLake, PostgreSQL, SQL Server, and SAP HANA.
- **Business Intelligence and Advanced Analytics:** deliver executive Power BI dashboards, DAX semantic models, and machine learning and computer vision pipelines in Python (Pandas, SQLAlchemy, and OpenCV).

Key projects (delivered):

- **Financial Control Tower:** developed and delivered an internal application with Power Apps, Power Automate, and SharePoint that centralizes executive documents by directorate, area, subject, and period, with role-based access via security groups and hierarchy rules, and automated delivery of a personal file copy to each user's OneDrive. Includes the project's executive presentation.
- **Sampling Report App:** built an industrial mobile app in Power Apps that lets operators record product sampling at their workstation, capturing process, line, shift, article, and responsible person, with a dedicated defect-sampling screen, digitizing and standardizing data collection.
- **SharePoint Document Management:** structured a multi-directorate environment (Finance, Supply Chain, HR, Industrial, and Commercial), with Python-based hierarchy mapping and an Excel permissions matrix to standardize folder structure and access governance.

Machine Setter H-28 | ***April 2022 – September 2025***

Responsible for equipment changeovers and corrective maintenance, with failure analysis and immediate corrective actions. Prepared technical and operational reports, performed machine setup, and supported programming and equipment adjustments to ensure production efficiency. Daily use of SAP for inventory control, purchase requisitions, and tracking of internal processes. Drafted and updated POD-SI (Documented Operating Procedure for Integrated Safety), operating manuals, and employee training.

Mechanical Fitter C | ***July 2019 – April 2021***

Technical contribution to the development and improvement of equipment and projects, focused on reducing failures and increasing productivity. Supported the training of new professionals in the field, acting as a technical reference and collaborating on hands-on training. Experience gained through technical education as a SENAI apprentice.

Education

Associate Degree in Data Science, emphasis on Artificial Intelligence | Centro Universitário União das Américas Descomplica | 2026
Data Science Program | Escola DNC | 2026
Technical Diploma in Mechanics | ETEC Presidente Getúlio Vargas | 2018
Industrial Apprenticeship (CAI) – Machining Mechanic | SENAI | 2017

Skills

Python (Pandas, SQLAlchemy, OpenCV) | SQL | PySpark | Delta Lake | Microsoft Fabric / OneLake | Power BI (DAX) | Power Platform (Power Apps, Power Automate) | SharePoint | SAP S/4HANA / HANA | PostgreSQL | SQL Server | Advanced Excel | R | Machine Learning & AI
